## Web Developer

### EDUCATION

---

#### BS in Programming and Data Science

IIT Madras  
2021 - 2025

#### BTech in Information Technology

GJU Hisar  
2020 - 2024

### WORK EXPERIENCE

---

#### React Frontend Developer | Fynii

Sep 2022 – Nov 2022

##### Role-

- Converting the code from HTML to React
- Adding functionalities of search, filter, sign up and sign in.
- Fixing the CSS and JavaScript of website.
- Resolving the production and deployment bugs

### PROJECTS

---

#### Music Application | Hotify

This is music application in which I used Shazam API and also a geolocation API so that we can listen to songs as per our location.

#### E-Commerce Application | Electroo Shop

This is an e-commerce application with functionalities such as adding/removing the product to/from Wishlist and Cart. We can create, edit, and delete any product(card) and also search and filter and product. All the data gets stored only in local storage.

#### Chat Application | Chatter Social

This is chat application built using firebase authentication and database. In this application, user has to register his/her account and then they can chat and share photos with the users that are already in the database.
